THIRTY-SECOND ANNUAL REPORT

OF THE

EXECUTIVE COMMITTEE

OF

ST. LUKE'S HOSPITAL,

SOUTH BETHLEHEM, PA.,

TO THE

BOARD OF TRUSTEES,

AT THE

ANNUAL MEETING HELD OCTOBER 18, 1905,

TOGETHER WITH

Reports of the Treasurer, the Medical Board, the Chaplain,

AND THE

LADIES' AID SOCIETY

OF ST. LUKE'S HOSPITAL.

# ST. LUKE'S HOSPITAL,

## SOUTH BETHLEHEM, PA.

---

FREE TO ALL WITHOUT REGARD TO NATIONALITY, COLOR OR  
RELIGIOUS CREED.

---

This institution, established especially for the benefit of our laboring classes, is beautifully situated near South Bethlehem, whose well-known salubrious climate has for many years rendered it a place of resort for invalids.

### Admission of Patients.

Accident cases are admitted at once upon application at the Hospital. If the patient comes by railroad, a telegram should be sent to "St. Luke's Hospital, South Bethlehem," stating the time and place of arrival, that the Hospital officials may be prepared to transport the patient.

All other medical and surgical cases will apply for admission by letter addressed "St. Luke's Hospital, South Bethlehem."

No contagious, chronic or incurable diseases, and no venereal diseases, consequent upon the immorality of the patient, are admitted for treatment.

Pay patients are received upon application by letter, as above.

### Dispensary.

The hours for dispensary patients are from 2 to 4 P.M., every afternoon, except Sunday.

Persons applying for free medical treatment must bring a note from some well-known person, stating their inability to pay.

No medicines are sold at the Hospital.

### Employees of the Lehigh Valley Railroad Company

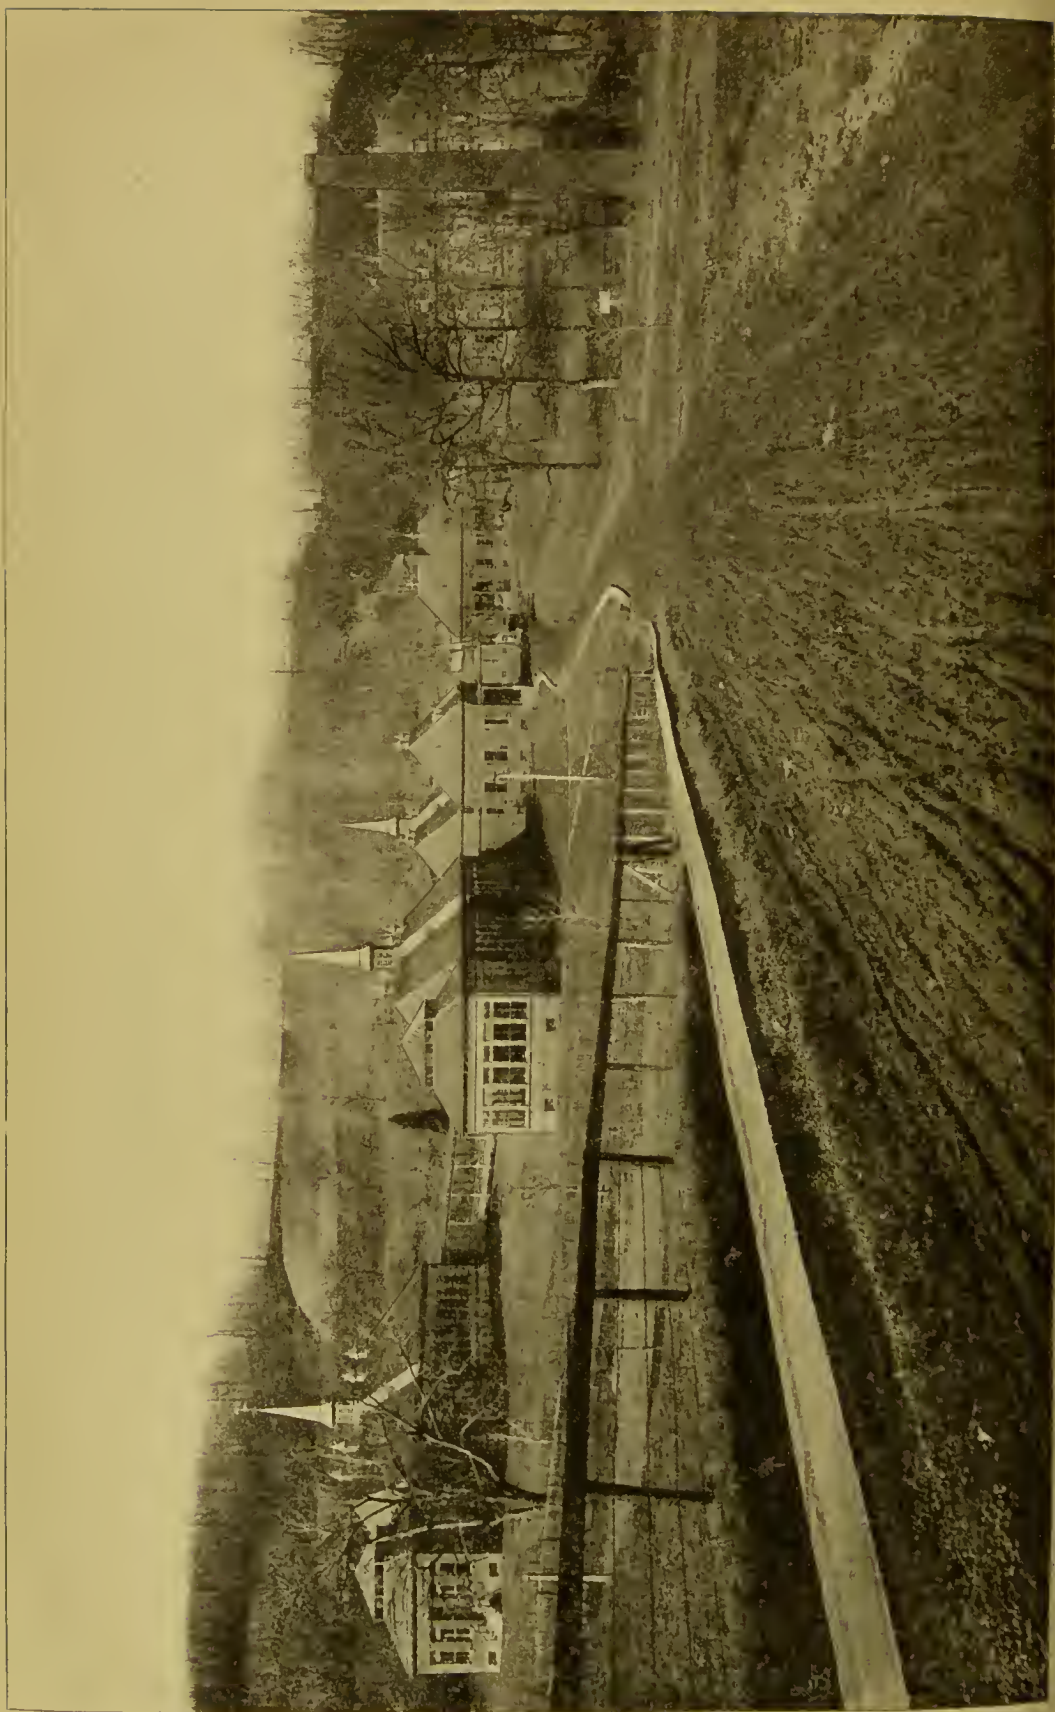

will be received free in the wards of the Hospital, or as dispensary patients, in accordance with the terms of the bequest of the late Hon. Asa Paeker. They will be required to bring a note from the Superintendent of the road, or division to which they are attached, countersigned by the Superintendent of the Lehigh Valley Railroad, stating that they are proper recipients of Judge Paeker's bounty.

### Contributions.

Contributions are earnestly solicited. Contributions of money should be sent to E. P. Wilbur, Treasurer, South Bethlehem.

Contributions of food of any kind, clothing, new or old, books, magazines and pictures, should be forwarded by freight trains to "St. Luke's Hospital, South Bethlehem."

## REPORT OF THE EXECUTIVE COMMITTEE.

### *To the Board of Trustees of St. Luke's Hospital:*

Your Executive Committee herewith submit their Thirty-second Annual Report, together with the reports of the Treasurer, the Chaplain, the Ladies' Aid Society, the Fruit and Flower Mission, the Physician- and Surgeon-in-Chief, and the Principal of the Training School for Nurses.

During the year 949 cases were treated in the Hospital; 336 of these were women and 130 were children; 56 cases were employees of railroads; 130 were employees of mills, furnaces or mines; 395 cases were from the Bethlehems and in addition thereto, there were from Allentown, 63; from Catasauqua, 22; from Slatington, 32; from Mauch Chunk, 12; from Lansford, 12; from Roseto, 20; from Nazareth, 20; from Bangor, 15; from Hellertown, 21 and from Easton, 25.

The total number of dispensary cases was 1154; total number of dispensary visits, 5648; 55 of these cases were employees of railroads; 854 were employees of mills, furnaces or mines; 681 were residents of the Bethlehems and vicinity.

There were 85 more house cases treated in the Hospital than during the previous year, and 477 more days of house service than during the previous year, the total number of days in the Hospital being 19103. The average number of days for each patient was 20.12 as against 21.56 for each patient last year.

The protection against fire has been increased by the installation of three fire plugs, 300 feet of hose with necessary couplings and branch pipes, all corresponding in size and style with those in use by the South Bethlehem Fire Department.

The application to State Legislature for an appropriation resulted in the passage by both Houses of a Bill granting us \$29,000. This was reduced by the Governor of the State to \$20,000, the same amount we received when we had twenty-five per cent. less facilities for our patients and correspondingly less cost for food, nursing and attendance.

## SUMMARY OF TREASURER'S REPORT.

1904.

Oct. 18. Balance on hand, to wit:

General Fund .....	\$ 161 24
Children's Ward Fund .....	832 32
Pathological Pavilion Fund .....	600 83
Leisenring Fund, awaiting investment....	740 80
Training School Fund, awaiting investment	1,200 00
	<hr/>
	\$ 3,535 19

ingly less cost for food, nursing and attendance.

The Women's Ward has been thoroughly renovated, painted and two porcelain bath tubs put in.

Mr. Calvin E. Brodhead has made a contribution of \$5,000 for the perpetual endowment of a bed in the Sayre Pavilion, in memory of his deceased wife, Mary Lewis Brodhead. An appropriate brass tablet, properly inscribed, has been placed on the wall over the bed.

Application was made by one of St. Luke's graduates, who came here for treatment, for a reduction from regular rate of charges. Your Committee reduced the rate fifty per cent. and ask that you confirm the reduction to all graduate nurses of St. Luke's, who are in good standing, that come to us.

There will be but one nurse graduating this year by reason of the lengthening of the term of instruction of the nurses from two to three years, this change we believe will produce superior nurses, and add to their desirability.

Director and Physician- and Surgeon-in-Chief, W. L. Estes, again calls attention to the need of the institution of a pathological building and mortuary chapel. This recommendation was urgently seconded in last year's report by A. L. Kotz, M.D., Pathologist. He says, "The Hospital is greatly in need of a suitable laboratory in which this work could be systematically carried on. May I beg of your Board your earnest consideration?"

The attention of the Board is called to a communication from the Director and Physician- and Surgeon-in-Chief presented to the Secretary of the Executive Committee to-day, urging the necessity of making such changes in the Women's Ward as are indicated in his communication.

THE EXECUTIVE COMMITTEE.

## REPORT OF THE CHAPLAIN.

---

The Rectory, South Bethlehem, Pa., October 13, 1905.

*To the Board of Trustees, St. Luke's Hospital:*

GENTLEMEN:—I have to report to you the regular discharge of my duties as Chaplain. I have visited the Hospital wards on Thursday of each week, except during my vacation in August, and have held on the second and the fourth Sundays of each month, a service with an address, for the nurses and the convalescent patients. This service has been omitted only when the heat in the solarium, during the summer, was unendurable.

Respectfully submitted,

GILBERT H. STERLING, D.D.,  
*Chaplain.*

## REPORT OF THE LADIES' AID SOCIETY OF ST. LUKE'S HOSPITAL.

*To the Board of Trustees, St. Luke's Hospital:*

The Ladies' Aid Society respectfully submits its Thirty-second Annual Report.

The Annual Excursion to Glen Onoko on Saturday, October the seventh, was successful. We are able to add \$1200.00 to the Training School Fund, which sum we hope to increase when our receipts are all in. This is less than our usual donation owing to the higher rate of transportation over the Lehigh Valley Railroad.

The Fruit and Flower Mission has done its work with great regularity throughout the year, dispensing fruit, flowers and ice cream every Wednesday to the patients in the wards.

The Mothers' Meeting of the Church of the Nativity of South Bethlehem has made its annual donation of garments.

MRS. WILLIAM H. CHANDLER,  
*President.*

MRS. CHARLES M. DODSON, Treasurer, in account with the Ladies' Aid Society of St. Luke's Hospital.

### Receipts.

To Balance Reported on Hand, October 17, 1904 .....	\$	60	45
To 1904 Subscriptions received, viz.:

## THE FRUIT AND FLOWER MISSION.

---

The Mission has been able to continue its weekly supply of ice cream throughout the year, thanks to the contributions of

MRS. SCHROPP,	MRS. CHARLES DODSON,
MRS. GEORGE MYERS.	MRS. TRUMAN DODSON,
MRS. JAMES DODSON,	MRS. JAMES DODSON,
MRS. R. P. LINDERMAN,	MRS. G. B. LINDERMAN,
MRS. MCILVAIN,	MR. KRAUSE,
MRS. R. H. SAYRE,	MRS. R. H. SAYRE, JR.,
MRS. MEIGS,	MRS. HALLIDAY,
MRS. RADFORD,	MRS. W. A. WILBUR.

The Mission is indebted to Mrs. Cleaver for its weekly supply of flowers, also to Mrs. Cleaver and to other kind friends for cards, toys, flowers, etc., at Christmas.

Miss Converse and Miss Ruth Linderman have attended to the weekly distribution of ice cream and flowers.

SARA WHITNEY CHANDLER.

October 18, 1905.

Treasurer.

## REPORT OF THE DIRECTOR AND PHYSICIAN- AND SURGEON-IN-CHIEF.

*To the Board of Trustees, St. Luke's Hospital:*

GENTLEMEN:—You will see from the statistical sheet accompanying this that the Hospital's work is increasing every year. We very much lack accommodation for women patients. So urgent is this need that I have addressed a separate and special communication to the Executive Committee and have renewed my recommendation that the private rooms of the women's pavilion be converted into two small wards for ward pay cases. This would procure a satisfactory arrangement for this class of women, and would serve to relieve the general ward of the great pressure it has almost constantly on its capacity.

We are still waiting for the pathological and mortuary building. The need of this is so constantly present that I feel confident your Board will some day realize the situation and will set about obtaining the necessary funds and will add this, the rounding out of the Hospital's departments and equipment. Nowadays the lack of a laboratory is as bad for a hospital as is the absence of a similar building or department for a School of Chemistry or Biology. Proper work and investigation cannot be done without it.

The walls of the women's pavilion have been newly painted. This work has added materially to the freshness, comfort and cleanliness of the pavilion. The floor in this pavilion is sadly in need of replacement. I recommend that this be done as soon as practicable.

The whole staff of the Hospital deserves commendation and acknowledgment. I most cheerfully and heartily thank and commend all the members for their work.

Respectfully submitted,

W. L. ESTES,

Director and Physician- and Surgeon-in-Chief.

## HOUSE CASES.

### Statistical Report of Cases Treated in the Hospital During the Year Ending September 30, 1905.

	Male	Female	Total	Children
Patients admitted during the year.	583	313	896	119
Children born in the Hospital.....	1	2	3	3
Remaining October 1, 1904.....	29	21	50	8
<hr/>				
Total number of Cases treated...	613	336	949	130
Discharged .....	540	287	827	109
New-born children discharged.....	1	1	2	2
New-born children died.....	0	1	1	1
Died .....	34	27	61	10
<hr/>				
Remaining October 1, 1905.....	38	20	58	8

#### Medical Cases Treated.

Discharged cured .....	108
Discharged improved .....	65
Discharged unimproved .....	22
Died .....	17
Remaining .....	8

Total ..... 220

#### Surgical Cases Treated.

Discharged cured .....	396
Discharged improved .....	211
Discharged unimproved .....	25
Died .....	44
Remaining .....	50

Total ..... 726

General mortality rate 6.42 per cent. 6 of these cases were admitted in hopeless conditions. Subtracting these, would reduce the mortality to 56 and the mortality rate to 5.91 per cent.

Whole number of days in the Hospital, 19,103.

Average number of days for each patient, 20.12.

Daily average number of patients, 52.33.

Number of operations performed on House Cases, 541.

Deaths after operation, 21.

Percentage of mortality after operations, 3.887.

#### Dispensary Cases.

New dispensary cases treated during the year .....	1,061
Old dispensary cases treated during the year .....	93

Total dispensary cases treated during the year.....	1,154
Number of visits of dispensary cases .....	5,648
Number of prescriptions dispensed to indigent dispensary patients .....	153

**Aggregate Summary of all Cases Treated in the Hospital.**

Total number of house cases treated .....	949	
Total number of dispensary cases treated .....	1,154	
		<hr/>
Total number of cases treated in the institution.....	2,103	
Number of operation performed on House Cases .....	541	
Number of operations performed on Dispensary Cases.	98	
		<hr/>
Total number of operations performed .....	639

Total number of fractures...	60	24	.....	7	13	104	
Total number of wounds.....	56	35	.....	5	9	105	
Whole number of injuries....	116	59	.....	12	22	209	

## Abstract of Honse Surgical Cases.—Div. II.—Surgical Diseases.

III. SURGICAL DISEASES.	Cured.	Improved.	Unimprov'd	Died.	Remaining.	Total.	REMARKS
Abscess of the abdomen and liver, general septic peritonitis .....					1	1	
Abscess of the abdominal wall..	1					1	
Abscess of the axilla.....		1				1	Dispensary.
Abscess of the back.....	1					1	Home at
Abscess of the breast.....		1				1	request.
Abscess of the breast, and lymphadenitis .....		1				1	Home at
Abscess cerebral, suppurative otitis media .....				1		1	request.
Abscess of the neck .....		2				2	Dispensary.
Abscess, ischio-rectal .....		1				1	Legt against
Abscess, pelvic, large, appendicitis, very extensive omental and intestinal adhesions.....				1		1	advice.
Abscess, pelvic, and phlebitis....		1				1	
Abscess, of the leg.....	1					1	Home at
Abscess, pelvic, large, septicaemia .....				1		1	request.
Abscess, periproctal .....		1				1	Home at
Abscess, perimygdalar, bilateral .....	1					1	request.
Abscess, prostatic .....		1				1	
Abscess of testicle.....		1				1	
Addenitis of neck, suppurative..	2	*1	*1			4	Home at
Addenitis of the neck and inguinal region .....		1				1	request.
Adenitis of the neck, tubercular .....	2					2	
Adenitis of the neck, suppurative; and phimosi.....	1					1	Home at
Adenitis, inguinal, suppurative..		1				1	request.
Adenitis, submaxillary .....		1				1	
Adenoids .....	4	*1			1	6	*Home at
Adenoma of the breast.....	3					3	request.
Adeno-carcinoma of the pelvis..				1		1	
Anchylosis, partial, of elbow-joint .....		*1			1	2	*Dispensary.
Anchylosis, partial, and oedema of fingers .....		1				1	
Anchylosis, partial, of shoulder-joint .....		1				1	
Adhesions, intestinal .....	1	*1	*2			4	*Dispensary.
Adhesions intracranial, and cerebritis .....					1	1	
Adhesions of stomach, and chronic gastritis .....	1					1	Home at
Angioma of scalp, and enterocolitis .....						1	request.
Anteflexion of the uterus.....	1					1	
Anteflexion of the uterus and gastritis, chronic .....		1				1

Amputation of hand (portion of).....	1	.....	.....	
Amputation of leg, lower third.....	3	.....	.....	
Amputation of leg, middle third.....	1	.....	.....	
Amputation at shoulder joint.....	.....	1	.....	
Amputation of stump of leg .....	1	.....	.....	
Amputation of thigh, middle third.....	3	.....	1	
Amputation of thigh, through condyles..	.....	.....	1	
Amputation of thigh, upper third.....	1	.....	.....	
Amputation of toe.....	4	.....	.....	
Amputation of toes.....	4	.....	.....	
Amputation of toe and suturing laceration of foot .....	1	.....	.....	
<b>Multiple Synchronous Amputations.</b>				
Amputation of four fingers right hand, and two fingers left hand.....	1	.....	.....	
Amputation of thigh, lower third, and portion of hand.....	1	.....	.....	
Amputation of thigh, lower third, and leg, lower third.....	1	.....	.....	
Amputation of thigh, at knee-joint, and leg, lower third.....	1	.....	.....	
<b>Amputations with some other synchronous operation.</b>				
Amputation of fore-arm, and draining and suturing laceration of leg.....	1	.....	.....	
Amputation of hand, and suturing multiple lacerations of scalp.....	1	.....	.....	
Amputation of leg, lower third, draining and exploring extensive laceration of the perineum .....	1	.....	.....	
<b>OPERATIONS ON THE ABDOMEN.</b>				
<b>(a) For Injuries.</b>				
Removing foreign body from abdominal wall .....	1	.....	.....	
<b>(b) For Surgical Diseases.</b>				
Alexander's operation .....	1	.....	.....	
Alexander's operation and curettage....	5	.....	.....	

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Alexander's operation, curettage and amputation of cervex uteri.....	1	.....	.....	
Alexander's operation, curettage and trachelorrhaphy .....	2	.....	.....	
Alexander's operation, curettage, trachelorrhaphy, perineorrhaphy and removal of recurring growth of eyelid...	1	.....	.....	
Alexander's operation, curettage, perineorrhaphy and radical cure of inguinal hernia .....	1	.....	.....	
Appendectomy for acute catarrhal appendicitis .....	5	.....	.....	
Appendectomy for chronic catarrhal appendicitis .....	22	.....	.....	
Appendectomy for gangrenous appendicitis .....	2	.....	.....	
Appendectomy for perforative appendicitis .....	1	.....	.....	
Appendectomy for suppurative appendicitis .....	1	.....	.....	
Appendectomy for suppurative appendicitis and suppuration of mesenteric glands .....	18	.....	2	
Appendectomy for chronic catarrhal appendicitis, and curettage of the uterus.	1	.....	1	Died
Appendectomy for chronic catarrhal appendicitis, and radical cure of ventral hernia .....	1	.....	.....	uremia.
Appendectomy for chronic catarrhal appendicitis, and removal of bilateral ovarian cysts.....	1	.....	.....	
Celiotomy for ectopic gestation (ruptured)	1	.....	.....	
Celiotomy, exploratory, for large cyst of the pelvis .....	.....	1	.....	
Celiotomy, exploratory for intestinal obstruction .....	.....	1	.....	
Celiotomy, exploratory, for tubercular peritonitis .....	2	.....	.....	
Celiotomy, exploratory, for tumor of liver.	1	.....	.....	
Celiotomy, exploratory, operation for recto-vesical fistula, and median perineal cystotomy .....	1	.....	.....	
Celiotomy, exploratory, after removing carcinoma of colon .....	.....	1	.....	
Celiotomy for extensive adhesions of the omentum and mesentery .....	1	.....	.....	
Celiotomy for general septic peritonitis, appendicitis .....	.....	1	.....	
Cholecystectomy .....	1	.....	.....	
Cholecystotomy and separation of adhesions of pylorus, colon and gall bladder .....	1	.....	.....	

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Cholecystotomy and operation for fistula in ano .....	1	.....	.....	
Cholecystotomy and choledochotomy....	1	.....	.....	
Cholelithotomy .....	4	.....	.....	
Cholelithotomy, pericystic abscess.....	.....	.....	1	
Cholelithotomy, choledochotomy and removal of a portion of the gall bladder.	1	.....	.....	
Curetting sinus of abdomen.....	1	.....	.....	
Draining abscess of abdomen.....	2	.....	1	
Exploration of sinus of abdomen.....	1	.....	.....	
Gastro-jejunosomy for carcinoma.....	1	.....	.....	
Herniotomy for inguinal hernia, radical cure .....	13	.....	.....	
Herniotomy for inguinal hernia, bilateral, radical cure .....	5	.....	.....	
Herniotomy for inguinal hernia, incarcerated, radical cure .....	1	.....	.....	
Herniotomy for inguinal hernia, congenital and strangulated, radical cure.	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, and removing sebaceous cyst of face	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, breaking up adhesions.....	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, operation for hydrocele.....	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, and for bilateral hydrocele.....	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, and operation for undescended testicle .....	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, and curettage of the uterus.....	1	.....	.....	
Herniotomy for inguinal hernia, radical cure, and operation for varicocele.....	2	.....	.....	
Herniotomy for femoral hernia, radical cure .....	1	.....	.....	
Herniotomy for double femoral hernia, strangulated left side, removal of wart from back .....	1	.....	.....	
Herniotomy for umbilical hernia, curettage of the uterus and perineorrhaphy..	1	.....	.....	
Hysterectomy, supravaginal.....	3	.....	.....	
Hysterectomy and partial oophoro-salpingectomy .....	3	.....	.....	
Hysterectomy and removing cyst of the broad ligament .....	1	.....	.....	
Hysterectomy and radical cure umbilical hernia .....	1	.....	.....	

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Hystero salpingo-oophorectomy .....	1	.....	1	
Hystero salpingo-oophorectomy and removing suppurative cysts of both broad ligaments .....	1	.....		
Hystero salpingo-oophorectomy, for bilateral pyosalpinx, with suppurating intraligamentous cyst and general septic peritonitis .....	.....	.....	1	
Hystero salpingo-oophorectomy, and appendectomy for suppurative appendicitis .....	.....	.....	1	
Ileocolostomy .....	1	.....		
Operation for general septic peritonitis, appendicitis .....	1	.....		
Operation for intussusception, removing 10 inches ileum, the caecum, ascending colon and two-thirds transverse colon .....	.....	.....	1	
Operation for intussusception, lateral intestinal anastomosis .....	1	.....		
Operation for intestinal obstruction, excising four feet gangrenous intestine..	.....	.....	1	
Oophorectomy, bilateral, partial, and appendectomy .....	1	.....		
Oophorectomy and removing intraligamentous cyst .....	1	.....		
Oophoro-salpingectomy unilateral, and draining pelvic abscess .....	1	.....		
Oophoro-salpingectomy, partial.....	4	.....		
Oophoro-salpingectomy, partial, and curetage of the uterus .....	1	.....		
Oophoro-salpingectomy, partial, and shortening round ligament.....	1	.....		
Oophoro-salpingectomy, partial, and appendectomy .....	2	.....	1	
Oophoro-salpingectomy, partial, and curettage and ventrofixation of the uterus.	1	.....		
Oophoro-salpingectomy, bilateral .....	3	.....		
Oophoro-salpingectomy, bilateral and appendectomy .....	2	.....		
Oophoro-salpingectomy, bilateral, appendectomy and removing intraligamentous cyst .....	1	.....		
Paracentesis abdominalis.....	2	.....		
Pyloroplasty .....	1	.....		
Removing carcinoma of caput coli.....	.....	.....	1	
Removing carcinoma of colon.....	1	.....	1	
Removing carcinoma of rectum, and ileocolostomy .....	1	.....		

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Removing cysts, intraligamentous bi-lateral, and uterine appendages.....	1	.....	.....	
Removing cysts, ovarian, bilateral.....	1	.....	.....	
Removing cyst, sebaceous of abdominal wall	1	.....	.....	
Removing fibro cyst of ovary.....	1	.....	.....	
Removing fibroids, multiple, from pregnant uterus .....	1	.....	.....	
Removing fibro-papillo-cystomata multiple, and exploration for carcinoma liver, intestines and omentum.....	.....	.....	1	
Removing parovarian cyst, and appendectomy .....	1	.....	.....	
Removing tumor of the colon.....	.....	.....	1	
Ventrofixation of the uterus, colporrhaphy and peineorrhaphy.....	2	.....	.....	
Ventrofixation, colporrhaphy and perineorrhaphy and curettage .....	1	.....	.....	
Ventrofixation, colporrhaphy and perineorrhaphy, curettage, and amputation neck of the uterus.....	1	.....	.....	
Ventrofixation colporrhaphy, curettage, amputation cervix, removing fibroid of uterus .....	1	.....	.....	
Ventrofixation, colporrhaphy, curettage of the uterus and removing pigmented mole from the vulva.....	1	.....	.....	
Ventrofixation and oophoro-salpingectomy, partial.....	1	.....	.....	
Ventrofixation and oophoro-salpingectomy, partial, and stretching sphincter anl .....	1	.....	.....	
Ventrofixation and oophoro-salpingectomy and curettage of the uterus.....	1	.....	.....	
Ventrofixation, oophorectomy, partial, and curettage of the uterus.....	1	.....	.....	
Ventrofixation, oophorectomy, partial, colporrhaphy and appendectomy.....	1	.....	.....	
Ventrofixation, perineorrhaphy and curettage .....	1	.....	.....	
Ventrofixation, perineorrhaphy, trachelorrhaphy, curettage, partial, oophoro-salpingectomy and removing intraligamentous cyst .....	1	.....	.....	
<b>OPERATIONS ON THE BACK.</b>				
Draining abscess of the back.....	1	.....	.....	
Draining abscess of the lumbar region...	1	.....	.....	
Draining kidney for abscess following laceration .....	1	.....	.....	

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Nephrolithotomy .....	1	.....	.....	
Nephrorrhaphy .....	3	.....	.....	
Nephrorrhaphy, curettement and trachel- orrhaphy, and removing sebaceous cyst of scalp .....	1	.....	.....	
Removing sebaceous cyst of back.....	1	.....	.....	
<b>OPERATIONS ON THE EYE.</b>				
Enucleation of eye.....	4	.....	.....	
Exploration after wound of the cornea..	1	.....	.....	
Exploration after explosion wound of the eye ball .....	1	.....	.....	
Removing piece of steel from the eye...	1	.....	.....	
Removing dislocated lens after wound of the cornea.....	1	.....	.....	
<b>OPERATIONS ON THE GENITO-URINARY REGION BY THE PERINEUM.</b>				
Amputation of cervix uteri.....	1	.....	.....	
Amputation of cervix uteri and curette- ment .....	6	.....	.....	
Amputation of cervix uteri and perine- orrhaphy .....	1	.....	.....	
Castration .....	1	.....	.....	
Circumcision .....	9	.....	.....	
Circumcision and removing adenoids....	2	.....	.....	
Curettement of the uterus.....	14	.....	.....	
Curettement of the uterus and operation for fistula in ano .....	1	.....	.....	
Curettement of the uterus and stretching sphincter ani .....	1	.....	.....	
Cystotomy, median perineal.....	.....	.....	.....	
Delivery of impacted shoulder presenta- tion in parturition .....	1	.....	.....	
Dilatation of stricture of the urethra....	1	.....	.....	
Draining abscess, inguinal region.....	1	.....	.....	
Draining abscess, ischio-rectal region....	3	.....	.....	
Draining abscess of the pelvis.....	2	1	.....	
Draining perirectal abscess.....	1	.....	.....	
Draining prostatic abscess and excising coccyx .....	1	.....	.....	
Draining prostatic abscess.....	1	.....	.....	
Operation for congenital deformity of penis .....	1	.....	.....	
Operation for congenital deformity of penis and scrotum.....	1	.....	.....	
Operation for fistula in ano.....	4	.....	.....	
Operation for hemorrhoids (cautery)....	5	.....	.....	
Operation for hemorrhoids (Whiteheads)...	1	.....	.....	
Operation for hydrocele, injection method	1	.....	.....	

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Operation for hydrocele, open method..	1	.....	.....	
Operation for hypospadias.....	4	.....	.....	
Operation for paraphimosis.....	1	.....	.....	
Operation for varicocele, open method..	6	.....	.....	
Operation for varicocele, Keyes.....	2	.....	.....	
Perineorrhaphy and curettage of uterus.	2	.....	.....	
Perineorrhaphy and curettage of the uterus, and removing hemmorrhoids.....	1	.....	.....	
Perineorrhaphy and curettage of the uterus, and trachelorrhaphy.....	5	.....	.....	
Prostatectomy, perineal.....	1	.....	.....	
Removing carcinoma of rectum.....	2	.....	.....	
Removing cyst (inclusion) of buttock...	1	.....	.....	
Removing cyst (inclusion) of coccygeal region, suppurating .....	1	.....	.....	
Removing polyps (uterine) multiple, and dilatation of os uteri.....	1	.....	.....	
Removing portion of rectum for extensive ulceration .....	1	.....	.....	
Removing portion of rectum for polypl..	1	.....	.....	
Removing portion of rectum and colon (fourteeninches) for ulceration, chronic inflammatory stricture, and oophoro-salpingectomy .....	.....	.....	1	
Removing sarcoma of inguinal region...	1	.....	.....	
Stretching sphincter ani.....	1	.....	.....	
Trachelorrhaphy and curretage of uterus	5	.....	.....	
Urethrotomy, external.....	1	.....	.....	
Urethrotomy, internal .....	2	.....	.....	
Urethrotomy, internal and external, meatotomy .....	1	.....	.....	
<b>OPERATIONS ON THE HEAD AND NECK.</b>				
(a.) For Injuries.				
Draining haematoma of scalp.....	3	.....	.....	
Draining punctured wound of neck, laceration of both auditory canals and fracture of both bones of the forearm.	1	.....	.....	
Draining, removing fragments and securing apposition after compound, comminuted fracture of the nasal bones...	1	.....	.....	
Elevating bones, removing fragments and draining after compound comminuted depressed fracture of the frontal bones .....	.....	1	.....	
Elevating bones, removing fragments and draining after extensive compound, comminuted depressed fracture of the vault of the cranium, with laceration of the longitudinal sinus.....	1	.....	.....	

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Elevating bones, removing fragments and draining and suturing after compound, depressed fracture of the skull with extensive multiple lacerations of scalp..	.....	1	.....	
Elevating bones, removing fragments and draining after multiple fractures of the vault and base of the skull with wound of dura .....	1	.....	.....	1 Died two weeks after operation of infarcted pneumonia.
Elevating bones, removing fragments and draining after compound, comminuted, depressed fracture of the vault of skull	.....	1	.....	
Elevating fragments and draining after multiple compound, comminuted, depressed fracture of the skull.....	1	.....	*1	*Died four days after operation.
Elevating fragments and draining after compound, comminuted, depressed fracture of the vault of the cranium and laceration of the kidney.....	1	.....	.....	
Elevating fragments and draining after depressed fracture of the skull, with intra and extra dural hemorrhage....	.....	1	.....	
Elevating fragments, trephining and draining after compound, comminuted, depressed multiple fractures of the vault and base of the skull.....	.....	1	.....	
Removing pin from fauces.....	1	.....	.....	
Stopping hemorrhage and draining after extensive laceration of scalp and compound, depressed fracture of skull....	1	.....	.....	
Suturing laceration of cheek.....	1	.....	.....	
Suturing laceration of lip.....	1	.....	.....	
Suturing laceration of nose.....	1	.....	.....	
Suturing laceration of scalp and foot....	1	.....	.....	
Suturing and draining laceration of scalp	3	.....	.....	
Wiring fracture of the inferior maxilla..	2	.....	.....	
Wiring compound, comminuted fracture of the inferior maxilla.....	2	.....	.....	
(b) For Surgical Diseases.				
Draining abscess of neck.....	5	.....	.....	
Draining peritonsillar abscess.....	3	.....	.....	
Draining dacryo-cystitis .....	1	.....	.....	
Draining furuncles of the neck.....	1	.....	.....	
Draining mastoid cells and cleaning out middle ear .....	.....	.....	.....	
Enlarging optic commissure of both sides	1	.....	.....	
Exploring cranium for abscess.....	.....	.....	1	
Exploring cranium for epilepsy following injury .....	1	.....	.....	

OPERATIONS	Cured.	Improved.	Died.	REMARKS.
Exploring oesophagus for foreign body..	1	.....	.....	
Exsection of portions of infra and supra-orbital nerves .....	1	.....	.....	
Exsection of superior maxilla.....	1	.....	.....	
Exsection of ulcer of fraenum of tongue.	1	.....	.....	
Operation for deformity of nasal septum	1	.....	.....	
Operation for mastoiditis .....	1	.....	.....	
Operation for mastoiditis, suppurative...	1	.....	.....	
Operation for tongue-tie.....	1	.....	.....	
Removing adenoids of pharynx.....	5	.....	.....	
Removing angioma of scalp.....	1	.....	.....	
Removing cervical glands.....	5	.....	.....	
Removing cicatrix of forehead.....	1	.....	.....	
Removing cyst of neck.....	3	.....	.....	
Removing epithelioma of lower lip and cervical glands .....	1	.....	.....	
Removing foreign body from the ear....	2	.....	.....	
Removing foreign body from the eyelid.	1	.....	.....	
Removing hairy growth from the forehead .....	1	.....	.....	
Removing meibomian cyst from eyelid..	1	.....	.....	
Removing nasal spur .....	1	.....	.....	
Removing sarcoma (melanotic) of neck.	2	.....	.....	
Removing sublingual gland.....	1	.....	.....	
Removing submaxillary gland.....	1	.....	.....	
Staphylorrhaphy .....	.....	.....	1	
Tonsillectomy, unilateral .....	1	.....	.....	
Tonsillectomy, bilateral .....	1	.....	.....	
Tonsillectomy, bilateral, and removing adenoids .....	2	.....	.....	
Wilde's incision over mastoid.....	2	.....	.....	

#### OPERATIONS ON THE LOWER EXTREMITIES.

##### (a) For Injuries.

Draining after compound fracture of metatarsus and severe laceration of foot .....	1	.....	.....	
Draining and removing fragments after compound, comminuted fracture of the bones of great toe, with cellulitis of foot and leg.....	1	.....	.....	
Draining and removing fragments after compound, comminuted fracture of both bones of the leg.....	1	.....	.....	
Draining and securing apposition after fracture of both bones of the leg.....	1	.....	.....	
Draining and securing apposition after fracture of the tibia and humerus....	1	.....	.....	

## Operations on House Cases—Continued.

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Draining and securing apposition after compound, comminuted fracture of both bones of the leg.....	1	.....	.....	
Draining and suturing large lacerated wound of the thigh.....	1	.....	.....	
Exploring, removing fragments, and draining after compound fracture of the femur and extensive compound, comminuted fracture of the ilium....	1	.....	.....	
Plating compound fracture of the tibia..	1	.....	.....	
Plating compound, comminuted fracture of the tibia .....	1	.....	.....	
Reducing compound dislocation of ankle joint, wiring and removing fragments, tenotomy of tendo Achilles.....	1	.....	.....	
Removing fragments of bone and draining after gun-shot wound of the leg...	1	.....	.....	
Removing fragments of bone and draining after compound, comminuted fracture of the metatarsus.....	1	.....	.....	
Removing fragments of bone and reducing dislocation of the metatarsus..	1	.....	.....	
Removing fragments of bone, draining and securing apposition after compound, comminuted fracture of the tibia	1	.....	.....	
(b) For Surgical Diseases.				
Curettage of ankle-joint for tuberculosis.	1	.....	.....	
Draining abscess of gluteal region.....	1	.....	.....	
Draining abscess of the hip.....	1	.....	.....	
Draining prepatellar abscess.....	2	.....	.....	
Draining abscess of the thigh.....	5	.....	.....	
Draining prepatellar bursitis.....	1	.....	.....	
Draining cellulitis of the foot.....	3	.....	.....	
Draining cellulitis of the foot and leg....	1	.....	.....	
Draining cellulitis of the leg.....	2	.....	.....	
Draining cellulitis of the toe.....	1	.....	.....	
Draining and suturing laceration of the heel .....	1	.....	.....	
Excising portions of varicose veins of the leg and thigh.....	1	.....	.....	
Exploring sarcoma of the thigh.....	.....	1	.....	
Exploring sinus of the thigh.....	1	.....	.....	
Incising cicatrix, and skin grafting for contraction following extensive burns of the leg and thigh .....	1	.....	.....	
Osteotomy of bones of the leg, bilateral.	1	.....	.....	
Removing sebaceous cyst of the thigh...	1	.....	.....	

## Operations on House Cases—Continued.

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Removing diseased bone for necrosis of the tarsus .....	1	.....	.....	
Removing diseased bone and draining for ostitis of the tibia.....	3	.....	.....	
Removing diseased bone and draining for osteomyelitis of the femur.....	3	.....	.....	
Removing diseased bone and draining for osteomyelitis of the ulna.....	3	.....	.....	
Removing end of the tibia from stump..	1	.....	.....	
Removing end of the femur from stump.	1	.....	.....	
Removing ingrowing toe nail.....	1	.....	.....	
Removing sequestrum from the tibia....	2	.....	.....	
Skin grafting (Thiersch).....	3	.....	.....	
Tenotomy tendo Achilles.....	1	.....	.....	
<b>OPERATIONS ON THE THORAX.</b>				
Dilating stricture of the oesophagus.....	1	.....	.....	
Draining pleural cavity and abscess of thoracic wall .....	1	.....	.....	
Exploration of oesophagus for stricture..	1	.....	.....	
Incising abscess of axilla.....	3	.....	.....	
Incising abscess of breast.....	1	.....	.....	
Paracentesis thoracis.....	3	.....	.....	
Plastic operation for closing thorax after gun shot wound.....	1	.....	.....	
Removing adenoma of breast .....	2	.....	.....	
Removing carcinoma of breast and axilla	1	.....	.....	
Removing carcinoma of breast and axilla and great pectoral muscle.....	4	.....	.....	
Removing carcinoma of breast and axilla, right side, and axillary contents left side .....	1	.....	.....	
Removing dead bone and draining after necrosis of the sternum and rib.....	2	.....	.....	
Removing portion of rib and draining for empyaema .....	5	.....	.....	
Removing necrosis of two ribs.....	1	.....	.....	
<b>OPERATIONS ON THE UPPER EXTREMITIES.</b>				
<b>(a) For Injuries.</b>				
Draining and stopping hemorrhage after crushed hand .....	1	.....	.....	
Draining, suturing muscles and stopping hemorrhage for severe lacerated wound of forearm, and removing sebaceous cyst of neck.....	1	.....	.....	
Exploration for foreign body in forearm.	1	.....	.....	

Operations on House Cases—*Continued.*

OPERATIONS.	Cured.	Improved.	Died.	REMARKS.
Reduction of subcoracoid dislocation of the head of humerus.....	1	.....	.....	
(b) For Diseases.				
Breaking up adhesions for partial ankylosis of the elbow-joint.....	1	.....	.....	
Breaking up adhesions for partial ankylosis of the elbow and shoulder-joints.	1	.....	.....	
Breaking up adhesions for partial ankylosis of the shoulder-joint.....	1	.....	.....	
Draining cellulitis of the finger.....	1	.....	.....	
Draining cellulitis of the forearm.....	1	.....	.....	
Draining cellulitis of forearm and hand.	1	.....	.....	
Draining cellulitis of the hand.....	3	.....	.....	
Draining the wound of the hand after severe crush .....	1	.....	.....	
Draining and replacing fragments after compound fracture of both bones of the forearm .....	1	.....	.....	
Removing displaced condyle after fracture of humerus .....	2	.....	.....	
Removing necrotic bone from the forearm .....	1	.....	.....	
Removing necrotic bone and draining after a crush of the hand.....	1	.....	.....

<hr/>	
Total .....	5

**General Surgical Diseases.**

Hernia, inguinal .....	11
Hernia, umbilical .....	2
Hernia and varicocele.....	2
Prepatellar bursitis .....	1

Prolapse of the rectum....	1
Salivary fistula.....	1
Sinus following appendec- tomy .....	3
Sinus following breast am- putation .....	2
Sinus following cholecyst- otomy .....	1
Sinus following compound fracture of the jaw.....	2
Sinus following compound fracture of the leg.....	3
Sinus following compound fracture of the skull.....	1
Sinus following empyaema operation .....	1
Sinus following varicocele operation .....	1
Sinus following ventral sus- pension .....	1
Stoppage of Wharton's duct	1
Synovitis of the wrist.....	1
Syphilitic stricture of rectum	1
Tongue-tie .....	1
Ulcer of the foot.....	2
Ulcer of the knee.....	1
Ulcer of the leg.....	3
Ulcer of the thigh.....	1
Ulcer following appendec- tomy .....	4
Ulcer following breast am- putation .....	3
Ulcer following enucleation of the eye .....	1
Ulcer of the stump after amputation of the arm..	1
Ulcer of the stump after amputation of the forearm	1
Ulcer of leg following scald	1
Ulcer following compound fracture of the forearm..	1
Ulcer following compound fracture of jaw.....	1
Ulcer of the leg, varicose..	4
<hr/>	
Total .....	61

**Obstetrical.**

Pregnancy and Metrorrhagia	1
----------------------------	---

**Skin Diseases.**

Acne vulgaris .....	2
Eczema, general .....	3
Eczema, of the anus.....	1
Eczema, of the scrotum....	1
Impetigo .....	1
Influenza .....	3

Lupus vulgaris .....	3
Miliaris .....	2
Psoriasis .....	1
Pediculosis .....	1
Scabies .....	3
Seborrhoea oleosa .....	1

Total .....	22
-------------	----

#### Diseases of the Ear.

Aural polyps .....	2
Mastoiditis .....	1
Otitis media .....	5
Otitis media, suppurative..	7
Otitis media, and neuralgia	1
Otorrhoea .....	9

Total .....	25
-------------	----

#### Diseases of the Eye.

Blepharitis .....	1
Conjunctivitis .....	5
Iritis .....	2
Laceration of the cornea...	1
Laceration of conjunctiva..	1
Myopia .....	1
Pannus and trachoma.....	1
Trachoma .....	3
Trachoma, otitis .....	1
Ulcer cornea .....	1

Total .....	17
-------------	----

#### Synecological Diseases.

Amenorrhoea .....	1
Anteflexion and stenosis of os uteri .....	2
Cervicitis .....	1
Endometritis .....	9
Haematoma and laceration of the vulva.....	1
Laceration of cervix uteri..	5
Laceration of cervix uteri, retroversion .....	2
Laceration of cervix uteri and endometritis.....	1
Laceration of cervix uteri and perineum.....	2
Laceration of perineum....	2
Laceration of perineum and endometritis .....	2
Laceration of perineum and cystitis .....	1
Leucorrhoea .....	1
Ovaritis .....	1
Prolapsus uteri .....	3
Pyosalpinx .....	1

Retroversion .....	24
Retroversion, laceration of cervix and endometritis..	2
Retroversion, laceration of cervix and ovaritis.....	3
Retroversion, laceration of perineum .....	1
Salpyngitis .....	5
Subinvolution of the uterus	2
Vaginitis .....	1
Vaginitis, dysmenorrhoea..	1
Vaginal varicose veins....	1

Total .....	74
-------------	----

#### Diseases of the Kidney.

Albuminuria .....	1
Nephritis .....	7
Nephritis and sclerosis....	1
Nephroptosis .....	1
Pyelitis .....	1

Total .....	11
-------------	----

#### Respiratory Diseases.

Adenoids .....	3
Asthma .....	1
Asthma, and adenoids.....	1
Asthma, bronchitis .....	1
Bronchitis, acute .....	7
Bronchitis, chronic .....	6
Bronchitis, hysteria.....	1
Deflected septum .....	2
Empyema .....	2
Nasal polyps .....	3
Nasal spur .....	2
Naso pharyngeal catarrh..	5
Peritonsillar abscess.....	1
Pertussis .....	2
Pharyngitis .....	1
Pleurisy .....	5
Pneumonia .....	2
Rhinitis atrophic.....	4
Rhinitis hypertrophic....	1
Tonsillitis, follicular.....	3
Tonsillitis, hypertrophic...	2
Tonsillitis, suppurative....	1
Tuberculosis .....	28

Total .....	84
-------------	----

#### Diseases of the Digestive System.

Cholecystitis .....	3
Cirrhosis and hyper, liver..	2
Enteritis, catarrhal.....	2

Enteritis, marasmus .....	2
Enterocolitis .....	2
Gastritis, acute .....	22
Gastritis, chronic .....	18
Gastritis, pyloric contraction .....	1
Gastric ulcer .....	3
Gastro-enteritis, catarrhal ..	11
Gastralgia .....	2
Gastroptosis .....	1
Hematemesis .....	1
Hepatitis, hypertrophic ....	1
Stomatitis .....	1
Stricture of the oesophagus ..	1
Total .....	73

#### Diseases of the Nervous System.

Chorea .....	7
Epilepsy, Jacksonian .....	1
Facial paralysis .....	1
Hypochondriasis .....	2
Hypochondriasis, sexual ...	1
Hysteria .....	2
Hysteria, gastritis .....	1
Locomotor ataxia .....	1
Meningitis, chronic .....	1
Mental disturbance follow- ing sunstroke .....	1
Neuralgia .....	2
Neuralgia, intercostal .....	3
Nurasthenia .....	2
Neuritis .....	2
Paralysis agitans .....	1
Paralysis, spastic .....	1
Paresis, spastic extension of the forearm .....	1
Sclerosis postero-lateral ...	1
Vaso motor neurosis .....	1
Total .....	33

#### Diseases of the Circulatory System

Arterio sclerosis .....	1
Arrhythmia .....	1
Endocarditis .....	2
Endocarditis, myscarditis ..	2

Mitral regurgitation .....	1
Myocarditis .....	2
Tachycardia .....	1
Varicose veins of leg .....	2
Total .....	12

#### Stab Wounds.

Chest .....	1
Leg .....	1
Total .....	2

#### Foreign Bodies.

Abdomen .....	1
Ear .....	2
Eye .....	13
Forearm .....	2
Hand .....	1
Palm .....	3
Total .....	22

Vaccinations .....	4
--------------------	---

#### General Medical Diseases.

Alcoholism .....	1
Anaemia .....	2
Chlorosis .....	2
Diabetes .....	4
Fecal impaction .....	2
Goitre .....	2
Lumbago .....	3
Malaria .....	1
Marasmus .....	1
Plumbism .....	1
Rheumatism, articular ....	10
Rheumatism, chronic .....	21
Rheumatism, muscular ...	1
Rheumatic cephalalgia ....	1
Rheumatism and endocar- ditis .....	1
Rheumatism and sclerosis ..	1
Rhus poisoning .....	3
Sciatica .....	5
Zinc intoxication .....	1
Total .....	63

## SUMMARY.

## REPORT OF THE PATHOLOGIST.

---

*To the Board of Trustees, St. Luke's Hospital:*

Gentlemen :

The pathological department during the last year, I am pleased to report, has made more progress than any before in its history.

The room set apart and equipped for pathological work during the year has given the department a home and has greatly facilitated the work of the pathologist.

The demands on this department are constantly increasing and in the past year more time has been given to this work than ever before.

We hope that your Board may keep in mind the growing need of this department.

Very respectfully,

A. L. KOTZ, M.D.,

Pathologist.

# TWENTIETH ANNUAL REPORT

OF

ST. LUKE'S HOSPITAL TRAINING SCHOOL FOR NURSES.

*To the Board of Trustees of St. Luke's Hospital:*

Gentlemen:

The Training School record shows 47 applications for admittance. 7 have been received, 4 nurses have been dropped from the school. This year we graduate our first nurse who has finished the three years course.

The Ladies' Aid Society painted the nurses' rooms and has given new curtains for the living room.

The Alumni Association gave \$25.00, with which chairs were bought.

The Graduating Class of '05, gave a parting gift to the Home.

Miss Linderman gave our Christmas treat, which is much appreciated.

Mr. Sayre and Mr. Wilbur sent special treats for the nurses at Christmas.

Mrs. Radford's Brace Fund received from Mrs. Radford, \$11.00; from Mrs. G. F. Pendill, \$5.00.

Very respectfully,

VICTORIA WHITE,  
Principal.

## REGULATIONS FOR THE TRAINING SCHOOL FOR NURSES.

The Hospital year begins on the first of October. The course of instruction extends over a period of three years. Pupils will be received whenever there is a vacancy.

Applicants for tuition in the Training School must be women between 20 and 35 years of age, and possess a good common school education. They must produce certificates of good character, good health, and physical capacities for the duties of nurses, satisfactory to the Superintendent of the Hospital, and should make their applications to the Principal of the Training School.

If admitted, they will be expected to serve two months for probation, if it is desired that they remain so long, during which time they will receive board, lodging and washing, but no compensation. Should the probationary period prove satisfactory, they will then wear the School uniform and become Pupil Nurses, though they will not be formally enrolled until the expiration of six months, thus allowing a longer period for the establishment of their adaptability to the work. Then, if accepted, they must sign an agreement to remain in the School, and subject themselves to the rules of the Hospital for the full period of three years from the commencement of the term, unless failing of promotion.

At the end of each term there shall be an examination of the graduating class, conducted under the supervision and in the presence of an examining committee, which being creditably passed, shall entitle its members to a diploma under the seal of the Hospital. Besides the final examination each pupil must satisfactorily pass the regular examinations every two months which belong to her course.

The Principal of the School shall exercise the functions of her office subject to the general authority of the Director. With this reservation, the School shall be under her direct

supervision and control, and her authority shall extend over all that pertains to the duties and discipline of the nurses in the wards, as well as to the details of their instruction in the school. All the servants and orderlies shall be responsible to her in the performance of such duties as relate to the nursing of the patients.

In case of misconduct or insubordination the Principal may suspend members of the class from duty, and refer the cases to the Director for final decision.

Board, lodging and washing will be furnished without charge; also the nurse's dress, cap, collars, cuffs, apron, shoes and books, but no other compensation. In sickness all pupils shall have gratuitous care, but the time lost on account of sickness must be made up by the pupil. The instruction will be given by the medical officers of the Hospital, by the Principal of the School, and by the Head Nurse of the ward; each ward being provided, as far as possible, with a Head Nurse, Senior Assistant and Junior Assistant.

It will consist, in part, of didactic lectures relating to the general principles of nursing; observation and recording of symptoms; the diet of the sick, and the methods of managing helpless patients.

Instructions will be given at the bedside:

1. Dressing of wounds.
2. Application of blisters, fomentation, poultices, cups and leeches
3. Use of catheter and administration of enemata.
4. Methods of applying friction.
5. Bandaging and making of rollers.
6. Making beds; changing draw-sheets and sheets; moving; preventing bed sores, etc.

## FORM OF APPLICATION.

This side is to be filled out in the candidate's own handwriting and sent to the Principal of the Training School, S Luke's Hospital, South Bethlehem, Pa.

1. Candidate's name in full and address..... } \_\_\_\_\_
2. Conditions in life, single or a widow..... } \_\_\_\_\_
3. Present occupation or employment..... } \_\_\_\_\_
4. Place and date of birth..... } \_\_\_\_\_
5. Height..... } \_\_\_\_\_
6. Weight..... } \_\_\_\_\_
7. Where educated..... } \_\_\_\_\_
8. Are you strong and healthy, and have you }  
always been so?..... } \_\_\_\_\_
9. Are your sight and hearing perfect?..... } \_\_\_\_\_
10. Have you any tendency to pulmonary com- }  
plaint? ..... } \_\_\_\_\_
11. Have you any physical defects?..... } \_\_\_\_\_
12. If a widow, have you any children? How }  
many? How old? How are they provided }  
for? ..... } \_\_\_\_\_
13. Where (if any) was your last situation? }  
How long were you in it?..... } \_\_\_\_\_
14. Names in full and addresses of two persons to }  
be referred to. State how long each has known }  
you. If previously employed, one of these }  
must be the last employer..... }  
has known me      years.
15. Have you read and do you clearly under- }  
stand the regulations?..... }  
has known me      years.

I declare the above statement to be correct.

## HOSPITAL DAY.

---

OCTOBER 18, 1905.

---

### PROGRAMME OF EXERCISES.

Music.

Reading of the Bible and Prayer,  
By the Rev. Gilbert H. Sterling, D.D., Chaplain of Hospital.  
Medical and Surgical Statistics for the Past Year, by Dr.  
Wm. L. Estes, Physician- and Surgeon-in-Chief.  
Financial Statement for the Past Year, by Mr. Elisha I.  
Wilbur, Treasurer of the Board of Trustees.

Music.

Address by Samuel Treat Armstrong, M.D., General Medicine,  
Superintendent of Bellevue Hospital, New York City.

Music.

Graduation of Nurse.

Presentation of Diploma, by the Rt. Rev. Ethelbert  
Talbot, LL.D., President of the Board of Trustees.  
Presentation of the Medals by Miss Victoria White,  
Principal of the Training School for Nurses.

Benediction.

Music.

GRADUATING CLASS.

Anna Footman McAlpin, Savannah, Ga.

## The Progress in Hospital Construction and Facilities in Recent Times.\*

BY SAMUEL TREAT ARMSTRONG, M.D.,

General Medical Superintendent of Bellevue Hospital, New York City.

"But when intemperance and diseases multiply in a State, halls of justice and medicine are always being opened; and the arts of the doctor and lawyer give themselves airs, finding how keen is the interest which not only the slaves but the freemen of the city take about them."—(Jowett's Plato. Republic, III, 1 405.)

This text from Plato suggests that there is much in common between the freemen of this interesting city and those of ancient Athens, for a retrospective review of the ceremonies associated with the celebration of the anniversary of your hospital indicates a keen and catholic taste in matters medical. Also it may be suggested to you that there are things in common between the doctor of to-day and his brother practitioner of Athens, and that the latter was not unique in the matter of giving "himself airs." Now as then intemperance and disease multiply in the State, and halls of medicine are always being opened.

Perhaps in no one way has civilized society more positively answered the inquiry: "Am I my brother's keeper?" than by its attitude towards the destitute sick. While establishments for their care existed in the earlier civilization, it has been reserved for recent years to develop such institutions to a more elaborate if not a higher perfection, that has kept pace with the increasing complexity of social organization. There was a time, and that not very remote, when the key-note of hospital management seemed to be: If he is careless enough to get sick anything is good enough for him; to-day the underlying principle of efficient hospital administration is, if one

\* An address delivered at St. Luke's Hospital, South Bethlehem, Pa., October 5, 1905.

is unfortunate enough to get sick, nothing is too good for him.

This last principle must not be interpreted as an excuse for elaborate and expensive structures built with lavish disregard of cost, and that justify the criticism that has been made that the interest on the money spent for buildings plus the expense of maintenance would suffice to care for all the patients in a good hotel. In other words an ordinary commercial enterprise could be conducted with necessary margin for profit, for a daily cost per person equal to that of the gross per diem cost per patient of the hospital. Undoubtedly you will all see the fallacy of such a generalization, for the hospital includes in its medical attendance, its remedial agents, and its nursing, service that is not included in that furnished by the hotel.

The need of proper provision for the care of the sick is appreciated so generally, that there are few communities that are without public or private hospitals. In a way the hospital is an expression of a characteristic demand of the American people; it is a labor-saving device. Under its roof there is concentration of energy in ministration to the sick: the medical staff, the nursing staff, the attendants, the appliances, accomplish much more and at less expense for the aggregate of patients than could be attained if they had to be distributed in each patient's home.

To meet the demand for these institutions hospital construction ranges from the alteration of a dwelling house to adapt it for its new purpose, to the erection of ornate structures that at least exemplify the art of the architect if not always his acquaintance with the needs of hospital administration.

Hospital construction has progressed to the point where it is understood that architectural effort should subordinate the ornamental to the useful. The solidity and force of the Doric order is said to combine "the most subtle and delicate refinement of outlines and proportions that architecture has known," and it accomplishes all that the more assertive and

ornate Corinthian order can attain. The architect of a hospital, be it urban or rural, should develop his ideas on the Dorian rather than the Corinthian plan; he should not erect a pretentious pile of stone or brick, but a simple structure in which every part has in view adequate accommodation with facility for administration.

Whether the hospital is in the city, the town or the country, certain requirements are essential. The building should be constructed with particular view to the purpose it is to serve, and should have a proper reception office and bath rooms for those admitted to treatment; storage rooms for clothing and effects so that when the patient goes into the ward he is properly clean, in a hospital uniform, and without clothing that could introduce either infection or vermin. In order to prevent contamination of any building, and also to disinfect household articles exposed to infection in the ward, there should be a sterilizing plant. The ward must be well-lighted and airy, and have balconies so that on fine days beds could be rolled from the ward to the balconies and the patients have full exposure to air. Connected with the wards should be toilet and bath rooms, dining rooms, closets for bedding and for ward property, lounging rooms for convalescents, quiet rooms for noisy or very ill patients, dressing and examining rooms, laboratory, and a steam drying room for sheets and blankets.

If surgical cases are treated there must be one or more operating rooms, with rooms for anaesthesia, photography and x-ray work. Scientific investigation has proved the value in many medical and surgical diseases of treatment by water and by movement made by machine, so there should be a room with baths and other apparatus for hydrotheraphy, and for mechanical treatment by movement.

In the routine of hospital work there is a constant contest against dirt, which has been aptly defined as "matter out of place," and visible and invisible dirt is the bane of the institution. There has been progress in methods of cleansing by using moist cloths, instead of dry sweeping and dusting, and

the recently introduced vacuum system of cleaning seems likely to be a boon for hospitals.

Economical and efficient administration will save time by intercommunicating telephones between all parts of the hospital. And the pneumatic tube system would lessen the daily work of the hospital.

The location of the hospital depends upon the character of work it will undertake. While those for the treatment of special diseases may be located in the country or even in the suburbs of a city, a general hospital must be situated so that it is in easy access of the population that it is to serve, so that the sick and injured may be taken to it with as little delay as possible. The increasing value of the land in cities entails a heavy expenditure for the purchase of a new site, or causes a board of managers to question the wisdom of continuing to use an old site that may be sold for more than enough to buy a new location and to pay for the necessary new buildings. To meet this condition it has been proposed that the hospital in the centres of business and population should be for the reception of patients, and the principal institution should be located in the country. While this latter is undoubtedly an ideal arrangement, the plan involves the transfer of patients in all seasons, and besides this discomfort the patients and their friends object so much to removal to a distance from their homes, that they will ask for their discharge when told they are to be transferred to the country branch. The hospital in the city is therefore an unavoidable necessity.

Whether the hospital should consist of a number of detached buildings, or of one single building on the sky-scraper plan is a mooted question. For administration purposes there is no doubt that in the city the high building is the more satisfactory, and for economical reasons it is the less expensive to build. But if the ground available is large enough to secure free exposure to light and air, two or three story pavilions are best, as one or more pavilions can be closed when requisite, and the general work of the hospital will not be interfered with.

A most important feature of progress is that the buildings should be fireproof. This necessitates iron framework and brick and stone construction; it costs more and lasts longer. Asepsis has taught the means of avoiding the infection that was thought to be an unavoidable feature in old hospitals, and that justified the plea for buildings for temporary use that could be destroyed easily. But they are rarely destroyed intentionally, the cost for repairs becomes heavy in time, and the authorities in charge are never free from apprehension of fire and attendant disaster. The modern building not only lessens risk of fire, but it lessens risk of lodgment of germs of diseases.

Ventilating, lighting and heating the buildings have been troublesome subjects: stoves, gas and lamps added to the vitiation of the air, which was changed by means of the interstices about the windows and by permeation through the walls. To-day there are mechanical means of ventilation that ensure proper and frequent change of air, the heating is by systems that convey fresh warm air, and electricity affords illumination without consumption of oxygen. The heating, lighting, ventilation and power are all supplied by a proper engine-room plant.

By means of elevators, furnished with proper protective devices and built in fire-proof shafts, the different floors of the building are easily accessible for the disposition of patients, the conveyance of food, and the distribution of bedding and other supplies. These should be inspected from time to time.

The food for general patients and employees is prepared in one or more kitchens that are equipped with the many kinds of apparatus that have been devised for cooking food in bulk. And in addition there is a diet kitchen in which special articles of diet are prepared, while each ward has its attached diet kitchen for cooking and preparing various foodstuffs that the physician may have ordered administered more or less frequently.

A large metropolitan hospital must have a refrigerating plant for the cold storage of various foods needed through the

day, and to contain perishable articles that are purchased in bulk because of favorable prices.

Everyone understands the need of clean clothing and bedding for the sick, and only a steam laundry plant will handle properly the washing for the institution. As any hospital may receive patients whose diseases are communicated easily, there should be a disinfecting and sterilizing apparatus for bedding and clothing.

More physicians, nurses and employees are needed for the administration of such extensive plants, and there must be buildings to house those who are needed for the care of the sick and the maintenance of the equipment.

Much money has been spent for operating rooms of marble, glass or metal, and perhaps in no part of the hospital has there been greater extravagance or greater disregard or surgical teaching than in this. Asepsis can be secured as well in the average bed-room as in the most elaborate operating room, and faulty technique on the part of the surgeon or his assistants will result as disastrously in the latter as in the former.

No hospital can be administered satisfactorily without a well equipped laboratory to allow of those examinations and investigations that are absolutely necessary for correct diagnosis and treatment.

The various features that have been cited have materially increased the cost of maintenance, for most of them are as essential in a small as in a large hospital, and there is a minimum of accommodation below which an institution cannot go without having an outlay disproportionate to return. Boards of managers are perplexed to find the means to meet the persistent expenditure, most of which is necessary to save life and to restore to health. There is a wide difference between the daily expenditure of \$1.09 by the Maine General Hospital, and \$2.37 by the Johns Hopkins Hospital, and yet each is working for the same end, and neither wishes to spend a fraction of a penny unnecessarily.

While mentioning the progress that is essential, it may be well to refer to some matters that show no progress. There

should be a uniform system of accounts, so that it would be possible for a board of trustees to compare its expenditures and cost units with those of other hospitals. It would be advantageous to establish a standard of records that are necessary, for there is much useless clerical work in many hospitals. It would be of advantage to establish standards for the various grades of supplies. It would be useful to compare the average duration of treatment of different diseases and the average expenditure of dressings, for the service of some physicians is quite an expensive luxury.

In planning a hospital the board of trustees or managers should include in its membership some ladies who are good housekeepers, and should not only consult an experienced architect, but they should employ some competent hospital superintendent to study and criticise the plans and specifications.

In the middle ages, and up to a comparatively recent date in some European countries, hospitals were managed by certain religious orders that made it their peculiar duty to care for the sick. This care included such medical treatment as represented the summation of the experience of generations of monks and nuns. In such hospitals traditional medicine found its highest exposition.

Some of you perhaps have visited hospitals of this kind in South American or Latin countries, in which the sick were housed in dismally lighted wards that opened on cloisters like those of a monastery; the walls bare of aught but a religious picture or a crucifix; the floors of brick tiles; the beds of canvas, hard and uncomfortable; chairs few in number; bedside stands unknown; the bedding of an uncertain color that suggested infrequent washing or poor bleaching; the meals served in the most primitive fashion and most unappetizing and unattractive. If an individual was very sick, a doctor might be called in, and his directions would be given to cover several days. Daily visits to the patients were unknown, and much of the treatment was of the "old wife" order.

It is probable that from this plan of administration by a

religious order arose at the present day the custom of placing the hospital under the superintendency of a layman. It seems that one of the features of progress in hospital administration is that the institution should be under the administration of a physician. It is conceded that it is not always possible to secure a physician who has had a necessary combination of professional and administrative experience, but the class of men available for such work is increasing. Certain of the larger hospitals in the country have on their staff younger medical men who are in training, and who will be in every way qualified to assume the important duties of the office of medical superintendent. I note that the organizers of this hospital very wisely recognized the advantage of having constantly at hand a trained professional man who, while acting as their executive officer, could advise them intelligently in all that pertained to the medical matters of the institution, and whose professional experience enabled him to anticipate the needs of the establishment.

When you think of your own institution many of you will say: what progress has been indicated, what has been mentioned that is not done here? I must apologize that I bring no new message. It would have been instructive, if neither edifying nor entertaining, to discourse on the relative merits of wood, tile or terrazzo floor for wards, on the question whether the kitchen and laundry should be located in the basement or the top story, whether nurses or doctors should be housed in or outside the hospital building, whether the ventilating should be by one of several systems, and similar topics that vex your superintendents. But my message is that progress lies in simplicity of construction, equipment, and organization. These institutions must be cared for by ordinary men and women in general, and our highest thought must be devoted to the question how we can secure simplicity of organization. With many of our employees we must remember to be to their virtues very kind, be to their faults exceedingly blind.

An important facility in hospitals at the present day is the intelligent co-operation of men and women, who give time,

thought and money for the work of the institution. Everywhere in the land there are those whose service in this regard is beyond price, who sympathetically lighten the labor of all engaged in ministering to the sick.

And now there remains mention of the great feature of progress in the modern hospital, the trained nurse. A little more than twenty-five years ago I commenced my hospital work in a large municipal hospital in which the nursing was by such chance employces as could be obtained. The trained nurse was then almost unknown. Since then she has been under my observation from the Atlantic to the Pacific coast, from the source to the outlet of the Mississippi, from the Pillars of Hercules to the islands of the China Sea, and everywhere she has done her task gently, intelligently and efficiently. Her training has qualified her to rise to the demands of an emergency, she quickly adapts herself to a new environment, her self-possession and tact inspire confidence, and she realizes in her work Goethe's beautiful thought :

Like a star in its course, unhasting, unresting,  
Let each one pursue his God-given 'hest.

There remains but to mention the greatest progress in hospital facilities, and that is the modern hospital physician. The education and training that is given in medicine now, make that afforded a score of years ago seem elementary and inadequate. Yet many of the teachers of to-day were the students of that period; but they were not content with what they knew, they recognized the vastness of the unknown, and they have striven and are laboring to discover the truth. The cynic's saying that "he who adds to human knowledge adds to human sorrow" does not apply to them, for their every effort in gaining knowledge is to lessen suffering, to make the weak strong, the sick well, those that are unfit to bear the heat and burden of the day fit to do some of the world's work. Consciously or unconsciously in his daily work as he sees the sick and goes unto them he realizes the gospel: "Inasmuch as ye have done it unto one of the least of these, my brethren, ye have done it unto me."

## DONATIONS OF CLOTHING, ETC.
